Location

Wah Cantt, Pakistan

TECHNICAL SKILLS

C++ / Python / Flask

Transformers / NLP / PyTorch

React.js / HTML

Tailwind CSS

Node.js

MySQL / MongoDB

Linux (Ubuntu / Rocky)

LANGUAGES

English

Urdu

Pashto

EDUCATION

BSc Computer Engineering Technology

IIUI, Islamabad

2023 – present

CGPA: 3.89/4.00

ICS

Scholar Science College, Wah
Cantt

2021 – 2023

CGPA: 3.89/4.00

CERTIFICATIONS

Introduction to Modern AI offered by
Networking Academy through the
Cisco Networking Academy
program

About Me

Aspiring Software Engineer with a background in Computer Engineering Technology, interested in building efficient and scalable applications. Experienced in developing web-based projects and exploring AI concepts. Eager to apply my skills, solve real-world problems, and grow in a professional engineering environment.

WORK EXPERIENCE

Web Development Intern | CodeCelix

August 2025 – November 2025

- Developed responsive and dynamic user interfaces using React.js and Tailwind CSS.
- Managed complex application state efficiently using Redux for a seamless user experience.
- Built and integrated RESTful APIs using Node.js and managed data storage with MongoDB.
- Debugged and resolved technical issues in a team-based development environment.

KEY PROJECTS

Bilingual Data Management Enhancement through LLM (FYP) Computer Engineering Technology, *In Progress*

- Developed a system for Urdu-to-English transliteration of names and addresses to improve data-entry accuracy.
- Trained an ByT5 model using a curated dataset.
- Built the user interface using React (Vite).
- Integrated the ML model with a Flask (Python) backend and MySQL database for seamless data management.

Real-Time Privacy Masking System

- Tech: Python, OpenCV, Tkinter, Haar Cascades.
- Developed a system to detect and blur faces in real-time video and images for privacy protection.
- Implemented Gaussian Blur with adjustable intensity and a custom GUI for manual control.

Secure Internal Messaging Server

- Tech: Rocky Linux, Postfix, Dovecot, TLS/SSL
- Deployed a secure email system on Rocky Linux using Postfix and Dovecot.
- Implemented SMTPS/IMAPS with SSL/TLS certificates for encrypted communication.
- Hardened security using firewall to restrict access to internal virtual networks.
- Managed user accounts and validated delivery via secure mail client testing.
